WHAT SHAWN TALKS ABOUT

Useful ideas for the next workday

Each session uses real systems, honest lessons, and clear decisions. No coding is required and there is no product pitch.

- 1 AI for the Business You Already Have**
Add AI to existing operations without replacing the full software stack.
- 2 From AI Idea to Working System**
Choose the right first workflow, scope it honestly, and earn the next project.
- 3 AI Ownership, Security, and Control**
Make clear choices about infrastructure, access, data, deployment, and ownership.
- 4 What Actually Works with AI**
Lessons from voice, private knowledge, legal research, finance, and automation.
